

BLANCO® Sink Care & Maintenance

BLANCO® CERAMIC FIRECLAY SINKS

How to clean a ceramic sink

To care for your ceramic sink, regular cleaning to remove dirt and prevent staining is recommended. For this purpose, liquid dish detergent, water and a soft sponge is recommended. We recommend the use of a non-abrasive cleaner and weekly cleaning. For daily cleaning, all you need is a standard sponge, mild soap and water:

- Slightly moisten the sponge under running water.
- Squeeze a small amount of detergent onto the soft side of the sponge.
- Clean dirt off your ceramic sink by rubbing the soft sponge over the surface in small, circular movements.
- Wipe down the surface dry with a microfibre cloth.

Additional tips for ceramic sinks.

- **Use liquid cleaners and rinse well after use**, for daily care remember to use sparingly. Our specially formulated BLANCOCLEAN sink cleaner will help maintain the beauty of the sink. Soft Scrub or Vim are also safe to use.
- **Avoid highly abrasive cleansers.** Although ceramic surfaces are impervious to marks, be aware certain cleaning agents should not be used to clean ceramic. These include, scouring agents or powder, highly concentrated drain cleaners, heavy-duty steel cleaners, prickly brushes or steel sponges.
